

## PPS200 – PrecisionPoint Essentials

A one-day on-site instructor-led course designed to introduce learners to PrecisionPoint Business Intelligence

### Prerequisites

Learners need a working knowledge of Excel.

Learners require a network connected pc with XLPublisher installed and activated.

### Audience

The target audience for this course is anyone creating or consuming information using the PrecisionPoint System. The 2nd half of the day involves a hands-on session which specifically targets report writers and power users.

### Content

- Overview of PrecisionPoint Software
- What is PrecisionPoint Business Warehouse?
- Introduction to OLAP intelligence
- Demo of PrecisionPoint with range of BI tools
- Browsing live data within the Business Warehouse
- Connecting to the OLAP data source
- Introduction to the XLPublisher tool
- Creating an XLPublisher report
- Interacting with an XLPublisher report
- Organizing data in an XLPublisher report
- Selecting dimensions and dimension members
- Report templates and basic formatting

### Goals

To introduce report users and report writers to the business intelligence attainable with PrecisionPoint Business Warehouse. To introduce report writers to the Excel add-in tool – XLPublisher.

To familiarize learners with OLAP terminology.

After completing the course, learners will be able to:

- Browse their live data in the PrecisionPoint Business Warehouse
- Create a connection to the PrecisionPoint Hyper-cubes
- Create basic reports using XLPublisher
